

5 reasons to use i26

It improves digestion

By targeting pathogens in the gut, i26 promotes the growth of good bacteria needed for optimal GI health.

01

Your immune system will be more effective

i26 augments the immune system's inventory with supplementary immunoglobulins, reducing the likelihood that infection will ever take place.

02

It regulates inflammatory response

i26 reduces the underlying stress that can lead to immune overstimulation and inflammation.

03

By providing the body with the necessary immune-modulating proteins, i26 improves your body's ability to maintain optimal balance and regulate inflammation.

80%

80% of the immune system is located in the gut.

04

It increases energy

i26 supporting your immune system allows it to perform other functions more efficiently, making you feel better.

It becomes a daily routine

You can mix i26 in all your shakes, smoothies, yogurts...

Taking i26 everyday ensures daily delivery of immune factors for overall well-being.
