## WHAT ARE ESSENTIAL OILS?

An Essential Oil is the fragrant life essence of a plant that has been gently extracted through the process of steam distillation or cold pressing. This purely extracted oil is then used to support an individual's needs.

### QUALITY MATTERS.

Youngevity delivers only the purest, authentic essential oils from the most respected and ethical distillers. Many of our oils come directly from families that have been distilling for more than 100 years. They use steam distillation or cold pressing with time-honored, non-destructive techniques to extract and preserve the integrity of each essence.

**NOTE:** Essential Oils should not be applied directly to skin but diluted with carrier oils, bath salts, or through a diffuser.
