

UPLIFT™ *Boost or elevate your mood.*

Your mood can turn a good day into a bad day – or vice versa. By elevating your mood, it can be easier to accomplish tasks, feel more energized, and enjoy an overall positive sense of well-being.

HempFX™ Uplift™ brings positive energy to your mind and your mood. Uplift naturally boosts your cognitive performance and provides sharpness, and clarity, to enhance your outlook. Our hemp-derived cannabidiol oil combined with St. John's Wort and a specialized set of terpenes (cannabinoid enhancers), takes your mood to a new level.*

Ingredients & Benefits

Phytocannabinoid Rich Full Spectrum Hemp Oil:

made from organically grown hemp, cannabinoids may support many aspects of health due to its anti-inflammatory, pain relieving and antipsychotic qualities.

Linalool Terpene:

most widely used to reduce stress, Linalool is a naturally occurring terpene found in many flowers and spices including lavender and coriander.

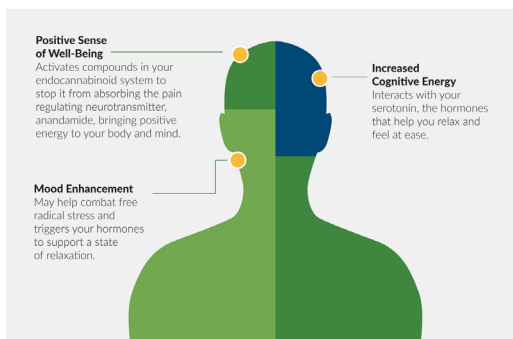

St. John's Wort:

widely used to relieve anxiety, this small flowering plant contains a rare combination of mood enhancing compounds.

Myrcene Terpenes:

the principle aromatic compound in hops, it may help produce sedative and motor relaxant effects.

HempFX™ Uplift™ is made using a proprietary, organically grown hybrid hemp plant combined with mood enhancing botanicals for targeted cognitive support. Our patent pending extraction & purification methods preserve the concentration of the CBD oil when taken from the hemp plant. This nutrient dense hemp-derived CBD oil is 3rd party tested for safety, purity, and potency. When combined with the most well-researched mood supporting botanicals, like St. John's Wort, it delivers powerful, targeted cognitive support for an elevated mood.

RELAX™ Say "goodnight" to sleepless nights.

SOOTHE™ Muscle restoration & relief.

UPLIFT™ Boost or elevate your mood.

Health Benefits of Hemp-Derived CBD

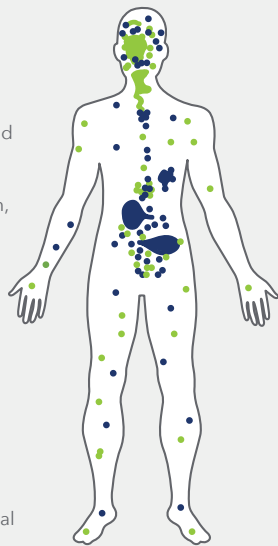

Cannabidiol (CBD), the active compound found in hemp, has become a highly sought after herbal nutrient. The research on the health benefits offered by CBD taken from hemp plants continues to mount. Unlike marijuana, hemp-derived CBD does not contain hallucinogens or unwanted side effects. Hemp-derived CBD offers natural therapeutic benefits on many levels.

CB₁

CB₁ Receptors: found in many parts of the body with high amounts in the brain and spinal cord. They have been found to support memory processing, motor regulation, pain awareness, appetite, mood and sleep.

CB₂

CB₂ Receptors: high concentration in the peripheral nervous system and immune system. These receptors are activated in response to inflammation; helping to combat free radical damage.

The Endocannabinoid System

One of the reasons that CBD is so effective is because of the endocannabinoid system (ECS) – a biological system found in the brain, organs, connective tissue, glands and immune cells. The ECS is a network of cannabinoid receptors (CB1 and CB2) that help cells throughout the body maintain homeostasis - or biological balance. In order for the body to perform efficiently, it needs biological balance. Research has confirmed that CBD interacts with cells in the body and can create positive changes in neurotransmitter activity. These positive interactions have been found to improve sleep, mood, and pain.

Why Hemp?

1. Emerging credible research outlining the benefits.
2. May support the root cause of health concerns.
3. Provides an immediate benefit with results-oriented ingredients.
4. Proven to be safe and consistent in the manufacturing process.

	LEGAL STATUS	CANNABINOID CONTENT	PRIMARY BENEFIT/USE
HEMP	Legal	High (Low THC < 0.3%)*	Medicinal/Health
MARIJUANA	Illegal in many states	LOW (High THC 15% - 35%)*	Recreational

*THC provides the 'high' or hallucinogenic properties found in cannabis.
