over 4 years of age.

OUR SOILS WERE NOT ALWAYS DEFICIENT IN MINERALS

Seventy million years ago, dinosaurs walked on soil rich with minerals. At least 77 of these minerals became water-soluble as they transmuted through the root system of plants, forming ancient flora that was luscious, succulent, vibrant, and life-sustaining. Eventually, these prehistoric plants became encapsulated in the Earth's crust in the form of humic shale. Each quart of **Plant Derived Minerals™** contains a wide spectrum of plant derived minerals leached from humic shale mined from Southern Utah and ranging from A to Z on the minerals list **Plant Derived Minerals™** is made from all-natural ingredients and has no starch, wheat, or yeast.

PLEASE REFER TO OUR ICON REFERENCE GUIDE @
WWW.YOUNGEVITY.COM

EACH QUART CONTAINS A NATURAL
ASSORTMENT OF APPROXIMATELY 19,000 MG
OF 100% NATURAL PLANT MINERALS SOLIDS.
