

RVB 300 and RYL BETA500
can be combined to deliver
extra immune support!†

RVB 300

(Beta 1,3-D Glucan, Resveratrol
and Vitamin C Blend)

A standardized, proprietary blend of Beta 1, 3-D Glucan, Resveratrol and Vitamin C, RVB 300 provides proven immune support for your everyday immune system needs. This proprietary blend utilizes Resveratrol derived from Japanese Knotweed, recognized for providing a higher return in immune response and dependable standardization. Plus, the addition of immune-boosting Vitamin C enhances the power of “the biologically most relevant immunomodulator*” providing a healthy balance of nutrients for your immune system.†

RYL BETA500

(Beta 1,3-D Glucan)

“The biologically most relevant immunomodulator*,” RYL BETA500, provides 500 mg of Beta 1,3 D Glucan. Through research, this dosage has shown to be beneficial to individuals who want or need significantly MORE immune support. RYL BETA500 delivers a safe and beneficial immune modulator to the body.†

The Immune System – Your Body’s Army

Your immune system plays a vital role in your overall health. It’s the body’s defense system, made up of cells, proteins, tissues and organs; fighting off infectious viruses and other harmful organisms that your body comes into contact with daily. When a foreign substance enters the body, immune system cells (white blood cells) work to destroy these substances by producing antibodies that fight off the pathogen.

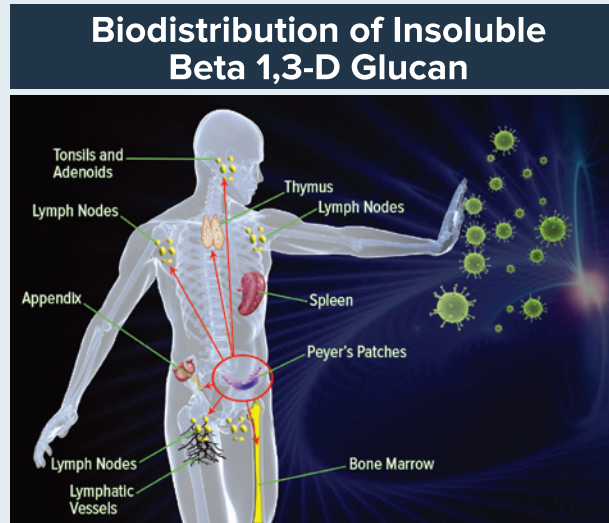

Whether it be the seasonal flu, chicken pox, or even a food-borne illness, your immune system battles a wide-range of viruses, bacteria, parasites and fungi. In order to maintain a fully-functioning immune system you need to make sure you provide it with ammunition to fight these foreign invaders.

Beta 1, 3-D Glucan – Immune System Ammunition

B-Glucans (Beta 1, 3-D Glucan) are natural compounds known as “biological response modifiers” that can be naturally found on the cell walls of yeast, the bran of grains, seaweed and some mushrooms species.

Specifically, B-Glucan derived from yeast (B-Glucan 1, 3/1, 6) has been noted for its high biological activity and ability to activate the immune system by binding to receptors on immune cells; making it one of the most powerful and highly-researched IMMUNE MODULATORS.†

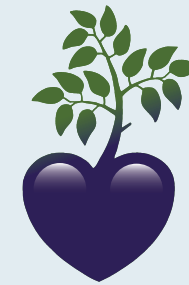

Are you ready to activate your immune system with the power of Beta 1, 3-D Glucan?

The Restart Your Life (RYL) products, RVB 300 and RYL Beta500, are powered by the immune-boosting, Beta 1, 3-D Glucan. By using Beta 1, 3-D Glucan derived from yeast, the Restart Your Life products can help initiate a healthy immune response in the body and improve one’s overall health.†

With other immune products, many times you end up taking higher dosages of a supplement in order to achieve a healthy immune response. In fact, other products will never reach the levels of immune activity that the RYL products provide; regardless of the dose. Even at hundreds of times the dose, these well-known and widely-sold immune supplements cannot match the smallest dose of the RYL products.

Macrophages containing Beta Glucan transport it throughout the immune system. Orally-dosed glucan is taken up by M-cells within the Peyer’s Patches of the small intestine. Macrophages, later along with

neutrophils, engulf and transport the insoluble glucan particles to all parts of the body’s immune organs. As they move throughout the body, they digest the particles into just the right-sized, water soluble molecules and secrete them to bind to and activate glucan receptors (CR3) on trillions of white blood cells (WBC) all over the body; boosting immune function!†
