

Youngevity

Each night, millions of people struggle to fall asleep, spending the night tossing and turning and dreading the sound of the alarm clock. The next day they wake up feeling tired and groggy...

sleep EZE™ key ingredients include:

5-HTP (L-5-Hydroxytryptophan) / 5-HTP works in the brain and central nervous system by increasing the production of the chemical serotonin, which can affect sleep, temperature, appetite, and other functions.*

GABA (Gamma-Amino Butyric Acid) / GABA is a naturally-occurring chemical known to affect mood. Low levels of GABA are associated with sleeplessness.*

Melatonin / This hormone may help you fall asleep faster and promote a healthy sleep-wake cycle.*

B Vitamins / Niacinamide may promote relaxation and is derived from tryptophan, an amino acid important for maintaining healthy sleep. Vitamin B6 is important for synthesizing GABA.*

Calcium and Magnesium / Deficiencies of these key minerals have been associated with poor sleep.*

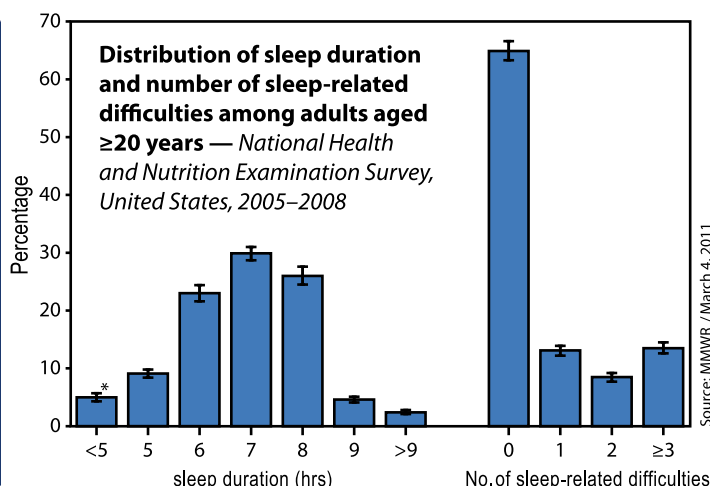

Proprietary Herbal Blend / Passion flower, valerian, lemon balm, chamomile and hops have been traditionally used to support a healthy, restful sleep.*

*If this sounds like you, all-new sleep EZE™ from Youngevity® can help. This all-natural sleep aid is specially formulated with natural substances and a proprietary herbal blend to promote a restful, relaxed state.**

Stop dreaming of the day when you finally wake up feeling rested and refreshed. Enjoy a healthful sleep and start your day with feeling energized and alert with...

Youngevity
