

STA-ENERGIZED+

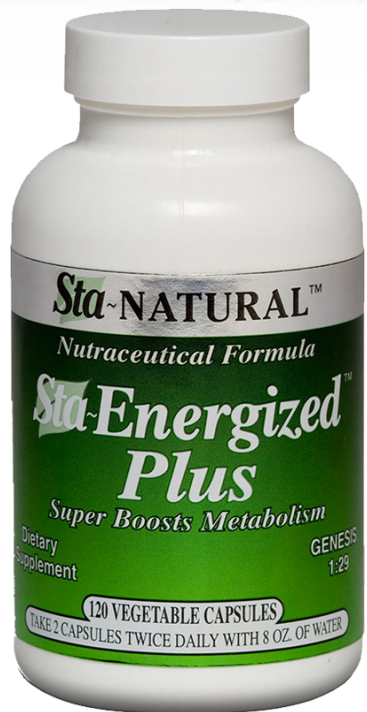

SKU NO. USSN000001

SUPER BOOSTS METABOLISM

Sta-Energized PLUS was formulated to raise the body's metabolism and create a thermogenic response to help create the burning of fat and building muscle mass. Sta-Energized Plus also will help burn those unwanted calories.

"I take the Sta-Energized Plus to keep up my energy level. I work long, hard hours and without the Sta-Energized Plus, I would be lost. I used to drink lots of pop and coffee to stay awake; my daughter would drink energy drinks. Now, we don't need them; we both drink water instead."

-Catherine, Oregon

INGREDIENTS THAT MATTER!

Chromium - helps prevent and lower high blood pressure; helps prevent sugar cravings and sudden drops of energy; helps in carbohydrate utilization.

Citrus Aurantium - helps stimulate the metabolic process, and increases the solubility of fats.

Ginseng Panax - used for fatigue, mental dullness, convalescence, athletic performance.

Bee Pollen - helps with quick energy, allergies and slowing down the aging process.

Royal Jelly - promotes energy and health, high in essential amino acids.

Kelp - helps with the thyroid, complexion and fat reduction.

Cayenne - works to improve vision and circulation.

L-Carnitine - increases physical stamina and promotes weight loss.
