WELLNESS 90 PROGRAM

The Wellness 90 Program focuses on making healthy, manageable changes to your nutrition. By simply eliminating “bad foods” from your diet and adding the 90 essential nutrients (Health Body Start Pak), your body will begin to rewire its metabolic pathways. The primary focus of this program is supporting your overall health.

The Wellness 90 Program helps you make simple and healthy changes to your diet. This program is a great option for individuals who have either completed the REV 90 or Keto 90 Program and met their goals, are not ready to commit to an intensive diet, or who’s primary focus is not weight loss but improving their general health. While some individuals do experience weight loss, the Wellness 90 Program focuses on long, sustainable changes to your overall health.
