YOUNGevity IS

Reinventing the Coffee Industry

ONE CUP AT A TIME.

“Field to Cup”

Any coffee lover will agree that there is nothing more gratifying than an aromatic, great tasting cup of java. Whether you're enjoying it with your breakfast or sipping on it while you chat with a friend, each cup should taste rich and fresh; like it's been roasted just for you.

This is the exact experience Youngevity International wanted to give every customer drinking a cup of coffee. Since acquiring CLR Roasters, our wholly owned coffee manufacturing subsidiary, we knew we wanted to differentiate ourselves from other coffee manufacturers. We wanted to be unequivocally sure that the coffee we were delivering to our customers, whether through retail sales, distributors or vendors, was ethically grown, safely processed and great tasting. Consequently, we, along with CLR Roasters, began taking the necessary steps to purchase our own coffee plantation.

This decision led our President and CFO, Dave Briskie, to the Siles Plantation in Nicaragua, where he journeyed through the dense, mountainous rainforest to reach the location that would soon become our coffee plantation and processing facility. During this journey, it became evident that we would not only be growing and processing coffee in Nicaragua, we would be helping to change the lives of the workers and the community surrounding the plantation.

Helping to improve the lives of plantation workers and their families became tremendously

important to us and the Be The Change Foundation – our nonprofit organization – whose mission is to aid families and communities in need. Together, we have helped rebuild plantation structures, reopen a school and a daycare facility, provide clean water and sanitation facilities, and establish a hydroelectric power plant to promote clean energy use.

With our own coffee plantation, processing mill and manufacturing facility in Miami, we can now ensure that customers are getting the best fair trade, rainforest certified, and organic coffee. From field to cup.

We take pride in the freshness and quality of our coffee. Now, coffee lovers can get exclusive coffees delivered straight to their doorsteps with the Javalution Coffee Club! These single country of origin coffees are exclusive to our club members. It's the world's best coffee doing a world of good— as 100 percent of the proceeds from sales of our coffee benefit the Be The Change Foundation. Each cup of coffee you drink has a positive impact on the lives of those who need it most.

We are committed to our customers and to the community that works so hard to produce truly remarkable coffee. We are so proud to share this amazing product with all of you – We hope you love it as much as we do!

NSF AND IFOS CERTIFICATION

Youngevity demonstrates its commitment to product excellence!

Youngevity has always been committed to providing the highest quality products with the greatest value to the consumer. Accordingly, the company is working with two highly respected independent testing organizations—NSF International and IFOS. The goal of these organizations is to protect both the consumer and the industry by establishing strict standards for purity and quality, and testing and certifying products at various points throughout the supply chain. They check for harmful contaminants and verify that the supplements contain the ingredients listed on the label and nothing else. Ultimately, these verification measures are about building trust in both distributors and customers, and providing products that represent a stand out value in the marketplace.

NSF® INTERNATIONAL (www.nsf.org)

- One of the most highly trusted 3rd party certification organizations in the world.
- The NSF mark (which will begin appearing on Beyond Tangy Tangerine® and other keystone products) is your assurance that a highly competent staff, including engineers, microbiologists, toxicologists, chemists, and public health experts, has thoroughly tested the product.
- NSF conducts unannounced inspections at all points prior to product sale.
- Annual audits assure compliance against the toughest testing standard in existence.

IFOS – INTERNATIONAL FISH OIL STANDARDS (www.nutrasource.ca/ifos.com)

- Certification service provided by Nutrasource Diagnostics, Inc. in Canada to specifically address the quality variations in fish oil supply markets.
- Conducts quality testing of omega-3 fatty acids (EPA, DHA) that are responsible for the numerous health benefits of fish oil products.
- Checks for the presence of heavy metals, PCBs, dioxins, furans, and other contaminants, since these can accumulate in the fatty tissues of fish.
- Performs shelf life and stability testing to verify nutritive values.
- IFOS certification has been granted for EFA Plus™ and S.M.A.R.T. Fx™ products.
